1. Project Overview

1.1 Project Purpose

The Internship Application (IAp) is a tool made to regroup all internship requests by students and link them with relevant companies' demands in a purpose to centralize the global internship market to make it simpler for everyone. It will consist of a singular online website or platform where students can login and enter their personal information and what they are looking for, while companies do the same with internship offers with important keywords. The application will then try to pair the student's profile with the most interesting propositions based on what both parties wrote and allow for a simple and efficient first contact. It will also allow the educational environment (such as a school or tutor) to monitor and validate the internship through a request once the contact has been made.

1.2 Project Objectives

The main objectives of Internship Application are to:

- Simplify the internship search and application process for students.
- Allow companies to publish internship offers and manage applications.
- Help school staff monitor students' internship progress.
- Centralize internship-related information and documents.

1.3 Business Goals

Internship Application will achieve the following business goals:

- **Improved Student Experience**: Make internship search and application tracking easier.
- **Increased Recruitment Efficiency:** Help companies manage internship offers and candidates more effectively.
- **Better Student Monitoring**: Allow school staff to follow students' progress during their internship search.
- **Reduced Administrative Work**: Limit the use of emails and spreadsheets by centralizing information in one platform.

1.4 Scope

Internship Application will cover the following areas:

- **Student Management**: Managing student profiles, skills, CVs, and application information.
- **Internship Offer Management**: Allowing companies to create and manage internship offers.
- **Application Management**: Allowing students to apply for internships and track application status.
- **Company Management**: Managing company profiles and received applications.
- **Internship Monitoring**: Allowing school staff to follow students' internship search progress.
- **Notifications**: Informing users about important application updates.

2. Stakeholder Analysis

2.1 Key Stakeholders

- **School management:** Monitoring the project the relation between students and compagnies.
- **Students:** Use the system to find internship offers and relevant compagnies.
- **Compagnies:** Publish internship offers and power the application through its offers.
- **Administrators**: Manage users and ensure the proper functioning of the platform.

2.2 Stakeholder Needs

- **Students** need an easy way to find relevant internship offers, submit applications, and follow their status.
- **Companies and Recruiters** need a simple system to publish offers and manage candidates.
- **School Staff** need an overview of students' progress to monitor their internship search.
- **Administrators** need tools to manage users, roles, and platform data.

3. Business Requirements

3.1 Functional Business Requirements

1. **Student Information Management**
    a. Students must be able to add, edit or delete information from their profiles such as their skills, personal information or CV
    b. School administrators must be able to see what their students uploaded to their profiles
2. **Internship Offer Management**
    a. Companies must be able to create new internship offers, mark them as completed and close them
    b. Students should be able to search and consult available internship offers.
3. **Application Management**
    a. Students must be able to apply to internships through the app and follow the status of their applications
    b. Companies must be able to see the applications students have done for the internships they created and accept/deny them after reviewing them.
4. **Company Management**
    a. Companies should be able to update their profiles, create new internship offers and review applicants for their internships
5. **Internship Monitoring**
    a. School administrators should be able to monitor the different internships their students have applied to and their statuses

3.2 Non- Functional Business Requirements

1. **Usability**
    a. The platform must have a simple and intuitive interface.
2. **Performance**
    a. The system should respond quickly to user actions and support multiple users simultaneously.
3. **Security**
    a. User data and uploaded documents must be securely stored.
    b. Access to features must depend on the user's role.
4. **Availability**
    a. The application should be accessible online at any time with minimal downtime.

3.3 Compliance Requirements

- The system must comply with **GDPR requirements** regarding personal data protection.
- Access to personal information must be restricted to authorized users.

4. Functional Requirements Mapping

4.1 Mapping Business Requirements to Functional Requirements

- **Student Profile Management** is linked to the SRS section dedicated to student profiles and documents.
- **Internship Offer Management** is linked to the SRS section dedicated to internship offer creation, modification, and search.
- **Application Management** is linked to the SRS section dedicated to internship applications and application status tracking.
- **Internship Monitoring** is linked to the SRS section dedicated to school staff monitoring.
- **Notifications** is linked to the SRS section dedicated to user notifications.

5. Business Process Flow

5.1 Internship Application Process

1. **Process:** The student searches for an internship offer, selects one, and submits an application.
2. **Inputs:** Student profile, CV, internship offer.
3. **Outputs:** New application stored in the system and notification sent to the company.

Diagram: A sequence diagram illustrating the interaction between the student and the system during the application process.

5.2 Internship Offer Publication Process

1. **Process:** The company creates and publishes a new internship offer.
2. **Inputs:** Company information, internship description, required skills, location, duration.
3. **Outputs:** Internship offer published and available to students.

Diagram: An activity diagram showing the internship offer creation and publication workflow.

5.3 Application Status Update Process

1. **Process:** The company reviews an application and updates its status.
2. **Inputs:** Student application and recruiter decision.
3. **Outputs:** Updated application status and notification sent to the student.

Diagram: A sequence diagram showing the interaction between the company, the system, and the student.

6. Risks and Assumptions

6.1 Risks

- **Data Privacy Risk:** Personal data, CVs, and application information could be exposed or accessed by unauthorized users.
- **Incorrect or Outdated Offers:** Companies may publish incomplete or outdated internship offers.
- **System Downtime Risk:** Temporary unavailability of the platform could prevent users from accessing offers or applications.

6.2 Assumptions

- Students, companies, and school staff will have access to the Internet and be able to use the platform.
- Companies will provide accurate and up-to-date internship information.
- Users will keep their profiles and application information updated.

7. Implementation Strategy

7.1 Phased Implementation

1. **Phase 1:** Implement user management, student profiles, and internship offer management.
2. **Phase 2:** Implement application management, status tracking, and notifications.
3. **Phase 3:** Implement school monitoring features, testing, and final system integration.

7.2 Training and Support

- Provide a simple user guide for students, companies, and school staff.
- Provide basic support for account, application, and platform-related issues.

8. Success Criteria

- **Student Usage:** Most students are able to search and apply for internships through the platform.
- **Application Tracking:** Students can easily follow the status of their applications.
- **Recruiter Efficiency:** Companies can publish offers and manage applications without major difficulties.
- **System Availability:** The platform should remain available with minimal downtime.
- **Administrative Efficiency:** School staff should spend less time manually tracking student internship progress.

9. Approval and Sign-off

This document is reviewed and approved by the following stakeholders:

- **Project Team:** [Names]
- **School Supervisor:** [Name]
- **Project Instructor:** [Name]
